

NEW TELEPHONE ENTRY SYSTEM (TES2) VERSION

- **TES2** creates a communication link between the front door and every telephone
- **TES2** has a maximum capacity of 2 doors. (1 door station is included, and it can be expanded to 2 doors)
 - Special telephones are not required
 - Shipped fully assembled and wired. (Includes speaker, microphone, circuit board, and power supply)
 - Door strike relay is included with all models that have keypads - this is used to open 1 or 2 gates
- **TES2** is recommended for distances of 1000' or less. For distances over 1000', Viking is recommended

SUMMARY CHART FOR **NEW TES2** CONTROLLER

Controller	No. of Door Stations	CO Line Required	Ring Confirmation	No Ring Mode	Door Strike Relay	Ring Patterns
 TES2 Holo P/N 9408-1	2	No	Yes	Yes	Optional - relay module for 2 gates	3 x 3 rings(Dr 1) 3 x 2 rings(Dr 2)

Ring Confirmation: When the door bell button is pressed, a tone is heard outside at the door

No Ring Mode: TES2 can be set so that there is no ring tone inside the house when the button is pressed. This feature is useful when traditional door bells are used as a door chime signal. When the door chimes are heard, the resident simply picks up the handset to speak with the person at the door. In order to use this feature, the HoloVision door stations should be ordered with a double pole button.

NO CO Mode: If there is no incoming phone line to the home (customer uses only cell phones), TES2 will work!. The customer would have to supply several ordinary telephones throughout the house to be used only for door phone calls.

Summary Chart for Controllers by Other Manufacturers

Controller	No. of Door Stations	CO Line Required	Ring Confirmation	No Ring Mode	Door Strike Relay	Ring Patterns
Channel Vision P/N C-0920 (Order Holo P/N 9401-1)	1	Yes	No	No	Optional	3 5 2 x 3
