Doorphone Programming

Instructions for E-10 and E-40 Doorphones

Microphone Volume

In certain noisy locations (traffic or wind), the microphone volume may need to be decreased. A symptom of this is one-way talk path, in which the distant party cannot be heard over the speaker. A "MIC VOL" adjustment is provided on the doorphone for increasing or decreasing the microphone volume.

Speaker Volume

The "SPKR VOL" pot can be adjusted to increase or decrease the speaker volume to the desired level.

Dip Switch Settings

DIP Switch	Position	Description
1	ON	Auto Answer - Doorphone answers when incoming call is detected.
2	ON	Call Timer - See E-10 manual for a description of this feature. Recommended setting is "ON". This is the factory default.
3	OFF	Programming Mode - E-10 is factory pre-set, and normally does not need re-programming. Refer to E-10 manual (Viking document which is included) for details

Holovision recommends the default settings on the dip switches. See the E-10 or E-40 manual for more information.
