

Prewire for Model 305, 400, 410, 519

Prewire for "S12" keypad

Prewire for all "Pan", "TES2", "Vik", "Elan", etc.

NOTE:

Wires shown in red are the minimum required

Wires shown in blue are recommended

Note on Essex Wiring: Electric motorized gates require only a contact closure from the S12 keypad. Electric strikes or mag locks can draw several amps, and the appropriate wire size should be calculated. Longer runs will require a heavier gauge wire.

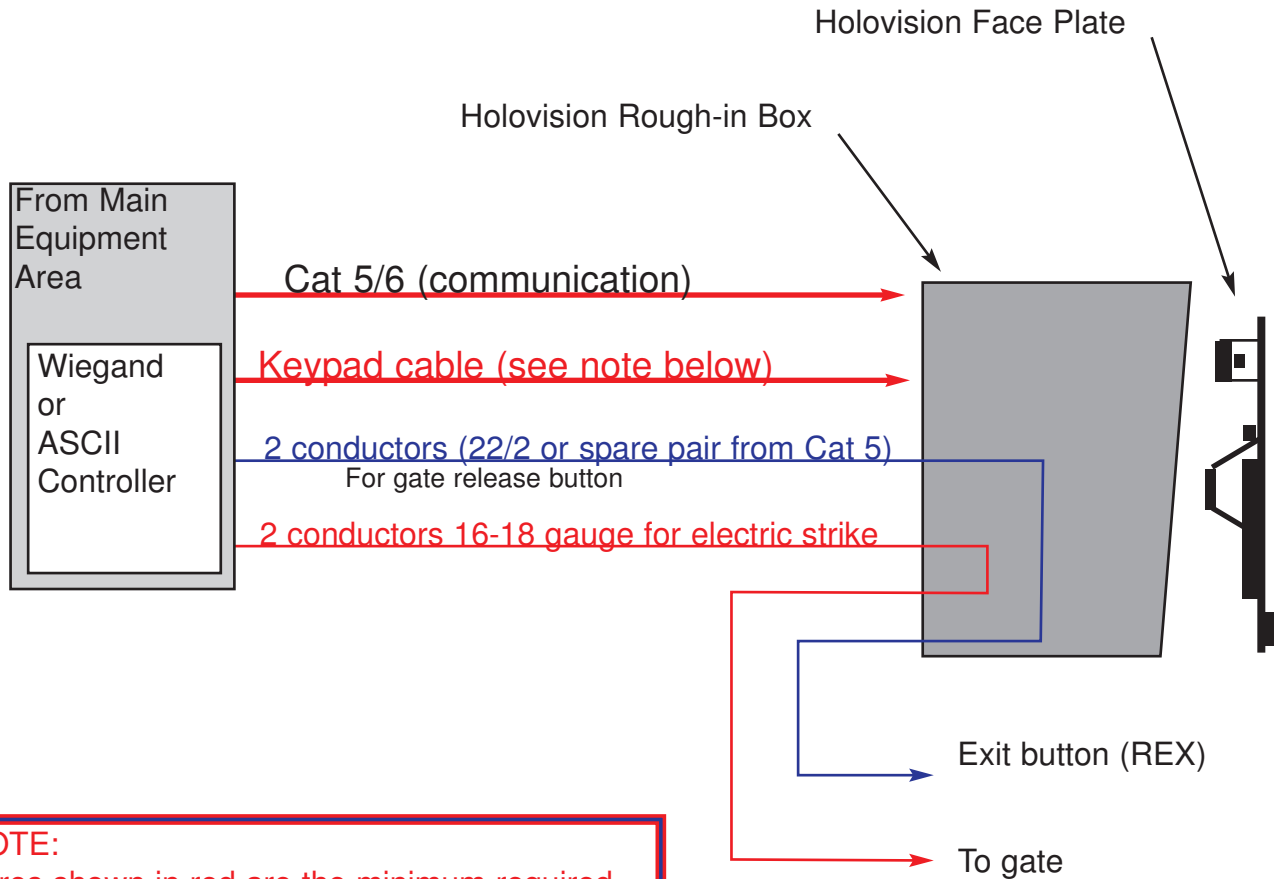

Note: If the power supply shipped with the S12 (12 VDC) is used to activate the strike, the strike will relieve 12 VDC. If AC is required for the strike, a separate pair of wires should be supplied.

Wire for gate release from phone system is required, but it can be a spare pair from Cat5/6
